5. All hardware is required to have a working load limit (WLL). Use only rated rigging hardware when constructing your sign. All hardware and equipment must be approved by the manufacturer for overhead suspension.
6. Rigging plots, drawings, blueprints or engineers certification (when requested) must be submitted to the OCCC Rigging department a MINIMUM of THREE WEEKS in advance of the first move-in day for your show and must include the location, the dimensions, the height above the floor to the top, and the weight of the suspended item. They must also show booth outline with aisles marked for reference.

Seams:

1. When using cloth material, seams need to be double stitched on the top and bottom.
2. Heat Seam is ONLY acceptable when hanging lightweight vinyl drape.
3. If the vinyl drape to be used as a drop down for a sign or banner, which would include a bottom batten to attach the foam core, sintra, or cloth/vinyl banner, the OCCC requires double stitching on the vinyl drape due to weight considerations and possible failure of the heat seam.

Adhesive:

1. Adhesive or glue tape is not acceptable due to the tendency of it to come loose under weight.
2. The use of any type of adhesive for attaching signs, banners, or decorations to the building walls or decorative surfaces (inside or outside) is NOT PERMITTED.

Hardware:

1. The manufacturer must rate all rigging hardware with a "Working Load Limit" (WLL).
